

Python seminar Homework for Chap. 4.2

1. Please plot a bar graph with COVID-19 infections for your preference three countries. The data can be available by the python command:

```
url = 'https://github.com/CSSEGISandData/COVID-19/raw/master/csse_covid_19_data/csse_covid_19_time_series/time_series_covid19_confirmed_global.csv'  
df = pd.read_csv(url)
```

Then, the confirmed number of COVID-19 infection in each country and region will be stored in “df”. Please plot the data as a piled bar graph as below.
