Python seminar Homework for Chap. 7.2 No.2

1. Please plot the climatological sea surface temperature based on the WOA 2018 data.
WOA2018 data can be available from
https://www.ncei.noaa.gov/access/world-ocean-atlas-2018/

Please draw a map for climatological data.

To read the netcdf file, following commands can be applied.
        file_name = "woa18_decav_t00_01.nc"
        nc = netCDF4.Dataset(file_name, 'r', format='NETCDF4')

To see the variables in a netcdf file, the following commands are helpful.
        print (nc.dimensions)
        print (nc.variables)
